CROTOLARIA SPECTABILIS. This wonderful new cover crop seed is being offered by us for the second year and we are very much enthused over this new soil-builder. The seeds are very small, resembling somewhat the Laredo soy beans, and are planted during the months of March, April, and May. There are two varieties: *Crotalaria Spectabilis*, also *Crotalaria Striata*. However, we find the *Spectabilis* variety is more in demand, as it grows larger and makes a bulk of organic matter. BUG DEATH

A non-poisonous powder, in composition peculiar to itself, inasmuch as it does not depend upon arsenic for its killing power. It is safe and sure to powder. It is safe and sure to use on potatoes, tomatoes, cucumbers, melons, eggplants and general garden truck. Can be used either dry or as a liquid. This is one of the most popular insecticides. 1-lb. can 25c; 5 lbs. \$1.25, postpaid.

PULVEX

The Popular Flea Powder

Is based on an entirely different flea-killing principle. Its use always kills all the fleas and lice, instead of only stupefying them, allowing them later to revive and reinfest the animal. Pulvex not only kills the fleas and lice but keeps them off for 7 days or longer. Absolutely harmless, even if swallowed; non-irritating to the skin; Pulvex is ideal for cats and birds as well as dogs. Odorless, easy to use, economical. Pulvex

will absolutely protect dogs, cats and birds against the discomforts and dangers of fleas.

DOUBLE NASTURTIUM
GOLDEN GLEAM

BEAUTIFUL DOUBLE NASTURTIUMS

NEW GOLDEN GLEAM NASTURTIUMS—Sweet scented semi-double richest clear deep yellow. Vigorous bush, profusely flowering in blaze of rich color, large 2½ inch flowers on erect 6 inch stems, held above foliage. Few 12-18 inch flowering runners.

SCARLET GLEAM (Double Sweet Scented)

Scarlet Gleam when grown in a large block has been likened to a huge fiery carpet spread over the ground. It is in fact the most intensely dazzling color one could imagine in a flower, even more showy than the vivid golden yellow of Golden Gleam. Similar in habit of growth, the type of doubleness found in the individual flowers is somewhat different from that known in the popular Golden Gleam. While Golden Gleam derives its effect of doubleness from petals which are markedly wrinkled, almost fluted, Scarlet Gleam is more or less plain petaled and deeper throated, although the individual petals are at least twice the size of ordinary Nasturtiums. The doubleness is caused by an overlapping of small petals toward the center. When grown under unfavorable conditions, therefore, the throat has a tendency to show, and the flowers appear but semi-double. When well grown, the general effect is that of complete doubleness. For cutting or garden use Scarlet Gleam has but few equals.

Packet 25c; Large Packet 50c; Ounce \$2.00

GLORIOUS GLEAM HYBRIDS (Finest Double Mixed)

The flowers are fine large, well formed sweet scented doubles, of the same type as the well known Golden Gleam. In habit of growth they also closely resemble Golden Gleam, with semi-dwarf plants throwing short runners from well rounded free flowering bushes. The stems are long and bear the flowers well above the lush green of the foliage, giving the effect of a solid mass of color. The color range includes an evenly balanced blend of the glorious assortment of brilliant shades: salmon, golden yellow, orange scarlet, cerise, cream yellow, orange, maroon, crimson, and many spotted varieties.

Packet 25c; Large Packet 50c; Ounce \$1.50; ¼lb. \$5.00
